

PROJECT TITLE	New Trolley Depot at Rouf
LOCATION	Rouf, Attiki, Greece
CLIENT	ILPAP (Trolley Busses of Athens – Piraeus Region) S.A.

DESCRIPTION

Scope of the work is the carrying out of the designs and studies of the **New Building Complex** for the **Trolley Busses Depot** within the 26.500 m² land property of ILPAP at Rouf district of Attiki Prefecture.

The Depot Building Complex has a **total surface** of **21.900 m²**, is developed in **two levels** (elevated ground floor and basement) and consists of the following **operations-areas**:

- a. Parking spaces for 180 trolley busses (12-meters long vehicles) inside and outside the building (including vehicles repair, cleaning and checking spaces)
- b. Checking, repair (minor and major), cleaning and dyeing areas including all necessary supporting spaces of above functions (engine-room, sheet metal shop, wheels repair shop etc)
- c. Spare and raw material storehouses
- d. Offices – Canteen
- e. WCs – Lockers
- f. Entrance-Exit Guardhouse
- g. Engine rooms – Boiler room – Cooler room - Substation

ADK has carried out all **design stages** (preliminary, final, implementation and tender documents) of the following studies:

- Architectural
- Structural
- Electrical/Mechanical Installations
- Landscaping
- Environmental Impact Assessment Study
- Transportation
- Geotechnical
- Hydraulic
- Topographic
