

Technical Advisor Services for the financing of the Construction and Exploitation of Faliron Marina Project

PROJECT TITLE

Technical Advisor Services for the financing of the Construction and Exploitation of Faliron Marina Project

LOCATION

Attiki Prefecture, Greece

CLIENT

HSBC

DESCRIPTION

ADK acted as technical consultant to HSBC, the project lender, providing technical advisory services for the financing, construction and operation of the Faliron marina, near Athens. More specifically, ADK provided technical support, examining all the marina structures (marine works, buildings, E/M installations) as per the tasks below:

- Examination and analysis on the preliminary design regarding its adequacy, pertinence, compatibility with time schedule and cost, its environmental impacts and the suitability of the proposed methods
- Review of the design and build contract
- Analysis of the method of works certification and commissioning of the project
- Confirmation of issuance for all relevant permits, certificates and other approvals necessary, prior to loan approval and drawdown of first installment
- Project monitoring during construction, recording of executed works and compliance check with initially estimated construction cost, financial model and time schedule; issuance of relevant drawdown certificate
