

Realisation through PPP of the Integrated Waste Management System of the Western Makedonia region

PROJECT TITLE

Realisation through PPP of the Integrated Waste Management System of the Western Makedonia region

LOCATION

Western Makedonia, Greece

CLIENT

MINISTRY OF ECONOMICS - SPECIAL DIRECTORATE OF PPP PROJECTS

DESCRIPTION

The Consultant is called to support the Special Directorate for PPP (Public Private Partnership) Projects (EGSDIT) and DIADYMA S.A. during the procedure of preparation and finalisation of the optimum type of Partnership and the selection of the most appropriate Private Partnership Body (PPB) who will undertake the design, financing, construction, maintenance, technical management and operation of the infrastructures for the Integrated Waste Management System of the Western Makedonia Region as well as the commercial exploitation of the products thereof, within the framework of the scope and requirements set forth by EGSDIT and DIADYMA with the Consultant's assistance.

The main services to be provided include:

- a) The finalisation of the business plan, of the Partnership's type and main parameters, of the risks allocation and securing of value for money for EGSDIT and DIADYMA S.A.,
- b) The study of alternative technical solutions applicable to the realisation of the project, meeting with the targets and responding to the requirements of the Greek and European Legislation,
- c) The preparation of Tender Documents for the selection of the PPB along with the provision of consultancy assistance during the evaluation of the Tenderers,
- d) The identification of the terms to be included in the contractual documents and the provision of consultancy services and participation in the negotiations with the candidate PPBs, and
- e) The transfer of know-how to the Greek Public Authority on all the above issues as well as on the monitoring of the realisation of the contract and ensuring of its quality.
